

# LYNX FLEXTTEST

Flexible testing service for electronic production  
without investment in test equipment

## FEATURES

- 50 measurement pins for V, R or C measurements to validate outputs, internal voltages, continuity, or components.
- 24 input stimulation pins.
- Communications: RS232, RS485, CAN, and Ethernet.
- Test equipment:
  - DC power supply.
  - 5.5 digit digital multimeter (DMM).
- Bed-of-Nails Test Fixture.
- Test software: Lynx Tester Scheduler:
  - Easy test setup by operators.

## PROBLEM

Short production runs do not justify investment in a test equipment.

## SOLUTION

- ✓ Outsourced testing service.
- ✓ Test equipment rental.

## BENEFITS

- ✓ Turn fixed costs into variable costs.
- ✓ Turnkey test system.
